# Wick Trimmers

Keeping the wick of your candle trimmed will help your candles burn fully and last longer.

Trimmers are made of stainless steel for long-lasting life and durability. They will help reduce soot on the candle walls and lengthen the life of your candle. After every burn, trim the burned wood to 1/4" - 3/16".

## Why Soy

Soy candles have a cleaner burn - without toxins, carcinogens, or pollutants. Our candles provide a long lasting burn that creates a strong hot and cold scent throw. We use higher quality fragrance oils that are infused with natural essential oils.

## Why Wood Wicks

The best part of a wooden wicked candle is the crackling sound it makes while lit. The crackling sound provides comfort, warmth, and relaxation. Wood wicks create a faster melt pool and provide a stronger scent throw. Our wood wicks are manufactured in the USA from Forest Stewardship Certified Mills.

Small batches created and shipped from Kansas City, Missouri.
